

BARTON WATER SUPPLY CORPORATION

101 Mt. Zion Rd. PO Box 272
Gordon, TX 76453 254-693-5258

REQUEST FOR WATER SERVICE FEASIBILITY STUDY

A Feasibility Study is necessary to determine the availability of water service and estimate the costs of connecting water service to you from the Barton WSC service area. A study shall determine if sufficient capacity exists in the distribution system to serve the proposed development, or if a need exists for an expansion to the line size and/or storage facilities.

The Feasibility Study is performed by an engineer selected by BWSC. Complete this form and submit with a copy of your property deed, or a detailed map of the area where service is being requested. It is understood that the \$250.00 Feasibility study fee is non-refundable, and must be paid for each feasibility study performed. This fee will be used to compensate Barton WSC and the engineer for expenses incurred in reviewing such requests.

APPLICANT NEEDS (fill in or mark all that apply, describe if necessary):

____ Residence with ____ people (standard service)

____ Business (specify intended water use on attachment)

____ Farm (specify intended water use on attachment, including livestock watering needs)

____ Multi-Lot development Number of meters needed ____ (non-standard service)

**see Barton Tariff Section (G-1), then process outlined in Section 'F'*

___ I am the current owner of the property described.

___ I do not currently own the property, but I am seriously considering the purchase of the described property.
